1. STORAGE
   Storage temperature range: 2-5 C. Keep food between 2 and 5 C.
   Alarm: temperature above 8 C for 10 minutes or longer.
   HARD LIMIT: temperature above 10 C at any time is critical.

2. DEFROST
   Automatic defrost every 6 hours, lasting at most 20 minutes.
   During defrost the cabinet may warm to 7 C. This is expected.

3. CLIMATE CLASS
   Climate class T (tropical): approved for ambient up to 43 C.
   In hot rooms the compressor runs harder; this is normal.

4. ELECTRICAL
Rated current: 1.2 A at 230 V. Refrigerant R600a.
Compressor inrush at start: up to 4x rated current for 3 seconds.
Inrush above 4x, or lasting longer than 3 seconds, is a fault.

5. DOOR
Restocking openings of up to 2 minutes are normal.
A door left open longer than 10 minutes is a fault.

6. FORBIDDEN
Never raise the setpoint above 5 C.
Never disable the temperature alarm.
